

CASE STUDY:

Diagnosis - Cerebral Palsy

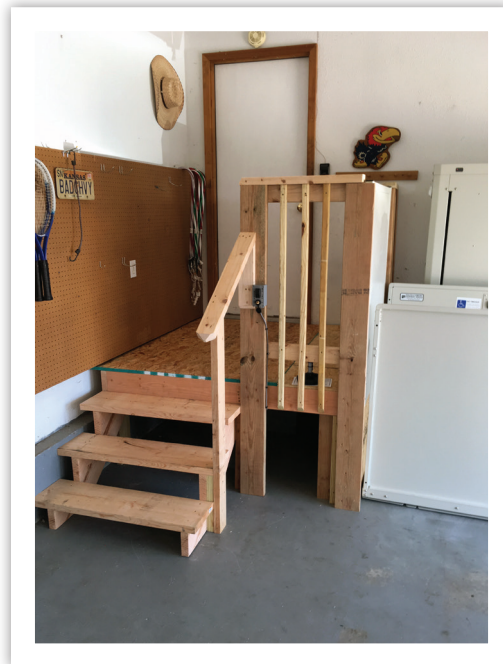

Waiver Type - Intellectually and Developmentally Disabled (IDD)

JEFF'S STORY

Jeff is a 21-year-old male with infantile cerebral palsy, epilepsy and profound intellectual disabilities. Jeff lives with his parents in a ranch style home and is assisted with all care tasks. There is a temporary ramp at the garage which is very steep, unstable and not in compliance with ADA recommendations. Due to a variety of limiting factors, construction of an exterior ramp was not a viable solution.

BEFORE

AFTER

THE SOLUTION

A vertical platform lift was installed at the garage. The installation included an adjacent stair entrance for the family. Jeff's parents and caregivers feel much safer now with renewed confidence about the accommodations.
