OBJECTIVES

1 Hip Impingement and Labral Tears: Diagnosis, Evaluation and Treatment
   a. Recognize clinical characteristics of non-arthritic hip pain and impingement.
   b. Understand implications of positive imaging for hip impingement.
   c. Understand treatment options for hip impingement.
   d. Describe pre-op and post-op rehabilitation principles.

2 Posterior Instability of the Shoulder
   a. Distinguish between posterior shoulder instability and traumatic anterior shoulder instability characteristics.
   b. Recognize and understand the pathomechanics of posterior shoulder instability.
   c. Understand treatment options for posterior shoulder instability.
   d. Describe rehabilitation principles and post-surgical timeline following posterior shoulder stabilization.
